AUDIT TYPE:
Announced Audit

AUDIT SCOPE:

Visit farm with honey Dew and Cantaloupe melon cultivation with a planting area of 443 ha, about 250 employees are kept on the farm to carry out the different work of the crop. The production is seasonal between the months of December to May approximately. The water used in the farm comes from wells, there is an irrigation system installed to supply the hydric needs of the crop and for fertilization of the crop through the drip irrigation method. In the irrigation system there is filtration and treatment of water with free chlorine of 1-3 ppm, the water is also used for pesticide application by means of spray equipment. At the time of the visit, irrigation work was being carried out, interviews with the available personnel are carried out, water sources, cultivation areas, sanitary facilities, food areas and chemical storage are verified. The perimeter of the farm is kept close, there are private security personnel at the points of entry to the cultivation areas. Lettering available at the entrance of the cultivation areas, where staff and visitors are reminded about the hygiene rules established by the company.
