AUDIT TYPE:

Announced Audit

AUDIT SCOPE:

Visit farm with honey Dew and Cantaloupe melon cultivation with a planting area of 402.12 ha. The water used in the farm for application work and personnel operation comes from a spring, wells and is stored in reservoirs. During the audit there were personnel performing cultivation tasks such as manual weed control and crop irrigation, it is indicated that about 250 employees are maintained to perform the different agricultural tasks. The production season is seasonal and lasts between November and May approximately. Fertilizer applications are made through the drip irrigation system. Pesticide applications are made through fumigation equipment. During the visit, field facilities such as toilets, mixing areas, reservoir, rest areas, chemical storage and farm office are verified. The entrance to the cultivation areas is maintained with controlled access, there are perimeter fences in the production areas, the access points have signage to remind staff and visits about established hygiene rules.
