AUDIT TYPE:

Announced Audit

AUDIT SCOPE:

Inspection of harvest crew, about 150 employees are maintained to carry out the harvest work on the farms. The melon harvesting process was observed, which is done manually, a knife is used to cut the fruit's peduncle, the product is aligned in the center of the groove, then collected manually and placed in the carts for shipment to the plant for the packaging process.

It is indicated that the production is maintained seasonally between the months of November to May approximately. At the time of the visit, the condition of the carts of the product is checked, a solution of free chlorine at 200 ppm is used for disinfection of tools and iodine at a concentration of 100 ppm for disinfection of the hands of workers, there are staff in the field assigned to perform the work of sanitizing the harvesters and the harvesting tool frequently. During the inspection, crop areas, sanitary facilities and rest areas for workers are verified. The staff is covered with head cloth, wear long-sleeved shirts, pants and closed shoes during harvesting.

PRODUCTS:

PRODUCT(S) OBSERVED DURING AUDIT
