AUDIT TYPE:

Announced Audit

AUDIT SCOPE:

Visit to the packing plant, they were working with melon cantaloupe during the inspection, about 180 employees are maintained on average to perform the different packing tasks. The water used in the operation comes from a well, has an installed filtration and water purification system. The operation is maintained during the months of December to May approximately. The product is received from the field in carts, the melon is discharged into the cell with water, it passes through a washing area in a cell with chlorinated water (100-200 ppm of free chlorine, PCC1), brushing fruit with water by sprinkling (100-200 ppm of free chlorine PCC2), first classification of fruit, rejection, post harvest application (fungicide + chlorine 3-5 ppm of free chlorine), fan drying, classification, packaging (pallet or bin assembly), coding of traceability, cold storage and subsequent distribution in containers. Pest control is carried out by internal company personnel, there are internal trapping and external cheating traps, chemical checks are carried out daily when there is packaging. During the visit, interviews with the available personnel are carried out, packing facilities, cold rooms, warehouses, water fountain, sanitary facilities and dining area are verified. The perimeter of the plant remains closed by there is internal surveillance, available signage at the entrance of the plant where the rules of hygiene for staff and visitors are established.
