**AUDIT TYPE:**

Announced Audit

**AUDIT EXECUTIVE SUMMARY:**

Harvest crew operation, which maintains about 100 employees at the time of inspection, production season between the months of November to May, harvest work was observed, which is done manually, the peduncle of the melon is cut with a knife, it is placed in the center of the bed, it is collected manually and deposited in carts to be sent to the plant for the packing process. At the time of the visit, a tour of the cultivation areas is carried out, dining areas, sanitary stations are verified and interviews are carried out with the available personnel. Free chlorine is used for the sanitization of the harvesting carts and for the knives, it is maintained at a concentration of 200 ppm. There is a person in charge of verifying that the harvesting personnel follow the hygiene procedures, when they start work, when using the toilets and during break times. It is evident that the cultivation areas have a perimeter fence, sensitive areas are maintained with controlled access and there is internal surveillance.
