**AUDIT TYPE:**

Announced Audit

**AUDIT EXECUTIVE SUMMARY:**

Packing plant dedicated to the packing of melons and watermelon, during the inspection the packing process of the melon was observed, which begins with the discharge of the product in the washing pile PCC1 (CL 150-250 ppm), goes through an elevator, brushing and application single-step water spray chlorine PCC 2 (150-250 ppm), post-harvest spray application (peracetic acid 80-100 ppm), sorting, rejection, air drying, distribution belt, packaging (bag + cardboard box ), conveyor belt, pallet assembly, labeling, pre-cooling, cold storage and distribution in containers. The water used in the plant comes from a well, there is a chlorinator installed in the water line, this is used for cleaning equipment, installations, personnel operation and for product washing. There is an established HACCP plan, the washing stage of the product in the pile (recirculated water) and spray washing in brushes as PCC has been identified, the recirculated water is changed daily, according to established parameters, the measurements are made every hour. Preventive controls plan, preventive control of supplier monitoring and sanitization have been identified.

**Addendum(s) included in the audit:**

U.S. FDA FSMA Preventive Controls for Human Food.

Product information for each product			
Product Group/Product Name	Observed Product	Seasonality	Country of destination for product
