AUDIT TYPE:
Announced Audit

AUDIT EXECUTIVE SUMMARY:

Visit to the melon packaging operation, which works seasonally between the months of approximately November to May, there are about 180 employees carrying out product packaging tasks, it is indicated that in high season there can be about 210 employees. In the packaging facilities, water is used from a well, it has a chlorinator installed in the water line for its drinkability, the water is used for cleaning the facilities, washing the product and operating the personnel. During the inspection, the product process flow is verified, from the discharge of the melon in a pile with a concentration of 200 ppm of CL (PCC1), belt elevator, brushing and washing by spraying with water in a single step at a concentration of 200 ppm CL (PPC2), subsequent disinfection with Tsunami 100 (80 ppm), first classification and rejection, second classification, band distribution, selection tables, packaging (bag+carton), product inspection, labeling, bag closing, stowage, traceability, cold storage and distribution in containers. There is a preventive control program implemented in the facilities. Pest control program that includes internal and external capture traps with chemical bait, daily reviews by internal staff.

Addendum(s)/Module(s) included in the audit:

U.S. FDA FSMA Preventive Controls for Human Food.
