Announced Audit

AUDIT EXECUTIVE SUMMARY:

Watermelon and melon packaging operation for export to the USA, it works during the months of approximately November to May, there are about 110 employees at the time of the inspection to carry out the different packaging tasks of the product. Water from a well is used for cleaning the facilities, operating the personnel and for washing the product. During the inspection, a tour of the different areas is carried out, such as receipt, washing, brushing, selection, rejection, product packaging, material storage, sanitary facilities, dining room, workshop, water source, and interviews are carried out with the available personnel. . The flow of the watermelon packaging process was verified, from belt unloading, pre-washing by spraying with single-step water (1-3 ppm CL), brushing, fruit disinfection by spray (150-200 ppm CL), post-harvest application with Tsunami 100 by spray (Peracetic acid 80 ppm), classification, rejection, distribution on tables, packaging in boxes or bins, pallet assembly, labeling, temporary storage and container loading. Established pest control program, includes internal and external capture traps with chemical bait, reviews are carried out daily by internal personnel.

Addendum(s)/Module(s) included in the audit:

U.S. FDA FSMA Preventive Controls for Human Food.
