**AUDIT TYPE:**

Announced Audit

**AUDIT EXECUTIVE SUMMARY:**

The operation is dedicated to conventional melon production (honeydew and cantaloupe) for export to the United States. Currently there are two harvesting crews, each consisting of 30 people, who do the work manually. First, a group of workers cuts the fruit with a knife and then another group collects it. They collect it and pass it to the people who sit outside the harvesting carts and place the fruit in the cart, which is covered with foam and nylon. The carts with fruit are taken directly to the packing plant for later packaging, so no post-harvest activities are carried out in the field. The activities of the harvesting crews were verified, the personnel were interviewed, and the areas used by the workers, such as restrooms and rest areas, as well as the growing areas, were inspected.

**Addendum(s)/Module(s) included in the audit:**

Not Applicable

Product information for each product			
Product Group/Product Name	Observed Product	Seasonality	Country of destination for product
Honeydew	Not observed but of a similar risk type to what was observed*	From: November To: May	United States
Watermelons	Not observed but of a similar risk type to what was observed*	From: November To: May	United States
