AUDIT TYPE:

Announced Audit

AUDIT EXECUTIVE SUMMARY:

The farm is dedicated to the conventional production of melon (honeydew and cantaloupe) for export to the United States. The farm uses water from several wells located within the same operation for all activities carried out on the farm: irrigation, fertigation, pesticide application, cleaning and sanitation, etc. The water from the wells is stored in reservoirs and there is a drip irrigation system installed. During the audit, it was confirmed that there are melons planted in different stages in lots (identified as shifts), as well as some others without cultivation or in preparation for planting. The field staff was carrying out various cultural activities such as collecting the baskets where the fruit is placed, checking the agribón that is placed on the plants, among others. The boundaries, cultivation areas, sanitary services, rest areas, wells and warehouse of supplies were inspected.

Addendum(s)/Module(s) included in the audit:

Not Applicable

Product information for each product

| Product Group/Product Name | Observed Product | Seasonality | Country of destination for product |
|----------------------------|------------------------------|---------------------------|------------------------------------|
| Honeydew | Observed on the day of audit | From: November To: May | United States |
| Cantaloupe Melons | Observed on the day of audit | From: November To: May | United States |
